THE REDCLIFF REVIEW, THURSDAY, OCT. 11th, 1928

Number 23

The Town Needs A Scavenging System

This Has Been Hanging Fire For Several Years

For some time past there have been periodic complaints from residents about the filthy condition of some of the back yards, lanes and outhouses in town. At a recent meeting of the council the question came up but nothing definite was done to solve the problem permanently.

There was a good sanitary system here at one time but it was discontinued. We are told, on the authority of the Utilities Commission, and ever since that time this work has been attended to only in a haphazard way and nothing definite has ever been done to inaugurate any kind of an organized permanent system for attending to this important branch of the town's responsibility. Any time it does come up for discussion it is on the Commission. And yet passed by, by laying the blame on the Public Health Act of Alberta says on page 36, section 145: "Every city, town or village shall provide for the proper cleaning of its streets." Section 186 of the same act says: "Every city, town or village shall provide for its proper scavenging."

It will be seen by this that the onus is on the council of every city, town or village and not on the Commission or any private household or individual. This being the case the sooner the council solves the problem the better.

First Death Here From Diphtheria

Ann Starch Died Suddenly Last Saturday

The first death so far from diphtheria occurred last Saturday evening when Annie Starch, the 13 year old daughter of Mr. and Mrs. Raymond Starch of this town, died at her home. Although complaining of a sore throat and not feeling well for a few days, she was out around on Friday. In the evening when she went home she complained of feeling worse. Dr. Rogers was called and found she was suffering from an advanced case of diphtheria, and in such a critical condition that he at once informed the parents that the child had a very poor chance to recover. The child grew rapidly worse and died that evening. The funeral took place on Sunday.

MOUNTIES TO PATROL CAN-U. S. S. BORDER

With the co-operation of the United States forces, a Royal Canadian Mounted Police patrol of the international border of the three prairie provinces, with view of ending the raids of U. S. bandits on the Canadian side. The mounted police are using fast motor cars and a thorough patrol will be conducted until the arrival of heavy snow makes the trails too difficult for the highwaymen to follow. Their speed automobiles to advantage.

SNOW AND RAIN HOLD UP THRESHING

The cold dip in the weather, accompanied by a flurry of snow which at the district Wednesday appears to have been general in the province. Although there is still a few thrashing to do around here it is only a very small percentage of the total crop. Most of the farmers took advantage of the exceptionally fine weather when cutting and the machines kept going steadily. Only a few farmers, however, were able to get through. It is estimated that over the whole province about 80 per cent of the grain is now threshed.

Harvest Service At St. Ambrose Church

Are Well Attended Despite The Prevalence of Epidemic

The prevalent epidemic cast somewhat of a shadow over the services in St. Ambrose church last Sunday, particularly by the churching of the children. The service was brightly decorated by the W. A. members and other helpers, and the attendance was good under the circumstances. The vicar preached in the morning from Deut. 26: 2, 10, on the "Thanksgiving offering of the first fruits, and particularly on the importance of the worship of the church as crowning all harvest rejoicing. In the evening he took as his text, Ecclesi. 3: 8, 30, 31, 35, as a hopeful forecast of the future of Canada, with the reminder that in the past resort to the blessing of God is not on people rather than on their circumstances. Therefore he promised, "Ye shall be My people and I will be your God," which was the best part of the service, its fulfillment being left in part to our future. There had been chosen as having been in the anthem, Stainera, "Ye Shall Dwell in the Land," which was well rendered by the choir. Mrs. Cann taking the soprano solo and her son Mr. Reginald, who gave a welcome voice to the bass solo with which the anthem opens. Mrs. H. J. Fox presided at the organ with her usual ability.

On Monday evening the regular whist drive proceeded the usual of decorations. There was a splendid display of lanterns and the attendance light must be desired (mainly owing to the usual alone preceded to the house above alluded to) but there were some good bids, and the total results of the Festival were well up to those of previous years. Mr. Rupert Gann made a very capable auctioneer.

Steal Organ and Stove From School

Breeze-Lawn School Broken Into And Goods Stolen

One of the meanest and most brazen thefts we have heard of in some time is reported this week from the Breeze-Lawn district. At some time since the school was closed down, some one broke into the school house and stole the organ, the stove, some dishes and other articles around the building.

H. Van Wort Has Bad Auto Accident

Was Thrown From His Car And Rendered Unconscious

When motoring to town from Alderson last Saturday, Henry Van Wort met with an accident as a result of which he is now confined to the hospital. He ran into a bad spot in the road when he applied the emergency brake skidded, throwing him. Van Wort out on the road. He hit on his head and was rendered unconscious. For some time he remained in a coma until a traveller came along and took him to the Alderson hospital where it was found he was badly bruised but the head and suffering from concussion. He is still in the hospital in a serious condition.

The visit of several federal cabinet ministers to the west has created extreme interest. They are showing in the renewal of old promises to build post offices and other public buildings, make oil field predicting general election in the near future. In Alberta Hon. Chas. Stewart is very active just now.

Good Suggestion For Lighting Streets

Have Verandah Lights on Residences on Dark Streets

Strangers coming to town—especially if they come on the night trains—are not a bit backward in telling us that, for a gas town, we have one of the most poorly lighted in the province. The worst of it is we always have to wait the mild impeachment.

Talking about this matter the other day, the suggestion was made that it would be a good idea if some arrangement were made with the gas company to have verandah lights placed on some of our houses on the darkest streets. This suggestion was brought to the attention of Mr. Hogg, manager of the gas company, and he expressed a willingness to co-operate in every possible way to have these lights placed on our houses. It was decided to adopt without adding any additional expense to those installing the lights as the gas company is willing to do it. This being the case it would be a good idea if the council would appoint a committee to interview the manager of the gas company and see if some satisfactory arrangement along this line could be worked out.

There are a few such lights at present used by private citizens and when they are lighted they make not only a great improvement to the appearance of the street, but a great help to pedestrians. Now that the dark winter evenings are coming on something should be done.

BAD MEMORIE FIRE

A bad prairie fire swept over Farmstead district last weekend. It covered a territory 22 miles long and from 2 to 10 miles wide. It is estimated that 100,000 bushels of grain were destroyed.

Town Asks Permission To Grade The Streets

Want To Take Advantage of the Government's Offer

At the meeting of the town council last Monday a resolution was passed instructing the secretary to write the Utilities Commission, asking permission for the town to take advantage of the government's offer to pay half the expense for grading and graveling the streets in town which are now on the newly surveyed main highway. According to the new survey the main highway through the town runs along Broadway from the east, to Third street, and then north to join the highway which parallels the C. P. R. The road between here and Medicine Hat is being graded and gravelled to the Premier Brick plant corner. It would be a serious blow to the town if the road were to end there, as just west of this plant has always been one of the main points in town after a rain or snow storm. It is hoped the Commission will sanction the expenditure as this town would like to enjoy any benefits there are from the tourist traffic.

Mr. and Mrs. John Reid and family, of the East Springs district, are moving to town for the winter.

After being closed down for ten days as a precautionary measure against the spreading of diphtheria, school opened again yesterday.

Churches

ST. AMBROSE CHURCH

Rev. J. L. Cooper
19th Sunday after Trinity, Oct. 14th.
Holy Communion 8 a. m.
Sunday school 10 a. m.
Matins and sermon 11 a. m.
(Evening) at Alderson 3 p. m.
Evening and sermon 7:30 p. m.
Monday Oct. 15 vestry meeting at vicarage at 8 p. m.
Tuesday Oct. 16 "Quiet Day" codified by Rev. Rural Dean Hilary, rectory of Maple Creek.
Holy Communion with short address 9:30 a. m. Service and address for children 4:30 p. m. Evening and sermon by conductor 8 p. m.
Wednesday Oct. 17 Holy Communion—but to be announced.
Thursday Oct. 18, St. Luke's Day. Holy Communion 8 a. m. Sunday school teachers' meeting 7:30 p. m.
Friday, Oct. 19, Children's choir practice in church 4:15. Evening 7:30 p. m. by choir practice.
Today, Nov. 21, is Children's Day. There will be a special service for children and parents in the church at 3 p. m.

GORDON MEMORIAL UNITED CHURCH

R. N. Matheson, R. A. Minister.
Strangers and visitors are very cordially invited to attend the service and to share in the activities of Gordon Memorial church.
Organizations meet as follows—
The Official Board on 2nd Tuesday in each quarter at 8 p. m.
Committees of Stewards on the 2nd Tuesday of each month at 8 p. m.
Women's Missionary Society on the last Thursday of each month at 3 p. m.
Ladies' Aid, every Thursday, 3 p. m.
Minister's Band every second Sunday at 4:15 p. m.
Services will be held as usual Monday and Tuesday evenings (Smith, the new pastor will conduct the services).

CHURCH OF THE BRETHREN

Rev. D. Hollinger, Minister
Usual services.

ST. MARY'S CHURCH

Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a. m.

Want Redcliff To Form Hockey Club

And Join Medicine Hat City League of Juniors

Plans are under way in Medicine Hat to form a junior hockey league in the city and those at the head of the movement have extended an invitation to Redcliff to form a team and join the league.

There is no reason why this town should not get up a team and accept this opportunity. There are a number of young hockey players in town; we have all kinds of vacant space where an open air rink could be laid out and we have all kinds of water with which to flood it. In the past we have heard a great deal from public speakers about the need of wholesome athletic sport for our young people. Here is an opportunity for goodness. Let us do something to get onto the sports map. Our young people are going to need for want of some kind of work out, for their surplus energy. If wholesome pastime is not provided for them we cannot count on their being other less-leisureable times.

At a recent meeting of the town council councillor Sitons suggested that risks be laid out to the children. We feel sure that we would get the backing of every citizen if he would undertake the laying out of a regulation sized rink for young and old, one that could be used for hockey. Some of the boys are by teams in the province have open rinks. Let us make a start this winter.

Work Started on Gordon Memorial

Carpenters Now Busy Completing The Auditorium

Work on the completion of Gordon Memorial auditorium was commenced last Monday. G. Fisher, rectory of Maple Creek, under the contract, has a gang of men now employed and it is the intention to rush the work through as quickly as possible. It is hoped to have it completed in five or six weeks.

Some alterations from the original plans are being made. The choir loft is being lowered and the pulpit is being changed. It is thought these changes will add to the appearance and convenience of the auditorium.

While driving to town last Tuesday Les Beck knocked a fine, big porcupine and brought it to town alive. It was on exhibition in his truck and drew quite an audience.

Here and There

(149) Brandon's first broadcasting station has gone into daily use and a studio located there will give grain and stock reports each day, and once a week in the evening will broadcast musical programs.

A training school for the co-operation of home industries is being taught at in Winnipeg, following the following: (1) the sale of the Canadian Pacific Railway. (2) the sale of the Canadian Pacific Railway. (3) the sale of the Canadian Pacific Railway. (4) the sale of the Canadian Pacific Railway. (5) the sale of the Canadian Pacific Railway. (6) the sale of the Canadian Pacific Railway. (7) the sale of the Canadian Pacific Railway. (8) the sale of the Canadian Pacific Railway. (9) the sale of the Canadian Pacific Railway. Signs Of A Better Era

The period of prosperity now so generally prevalent throughout Canada and the United States, and the marked rise in industrial activity in all lines all over this continent, and which is being felt to a steadily increasing extent in Great Britain and other European countries, seems to present to those informed minds and agitators an opportunity to once again revive the old "strike" weapon. When times are hard, business depressed, with large numbers of men unemployed and anxiously seeking work, the agitator men rejoicing in employment to "strut" his hard won tail, but when business is brisk, the vast majority of men employed, and an increasing demand for labor, the agitator sees his opportunity to make trouble.

Fortunately, both employers and employees have learned from past bitter experience that industrial warfare does not pay, any more than does war between nations; that the victor suffers almost as great damage as does the vanquished; and the general public which after all is the greatest sufferer is new more and more inclined to sternly oppose the calling of a "strike."

Relations between the bosses on the one side and the men on the other have been bettered and become more cordial in recent years through a realization of a truth, which ought to have been recognized long ago, that, in the final analysis, their interests are common. Employers today do not regard their men as mere machines, but as real and active partners in the success of the business enterprise. The men, on their side, have learned the workman today recognizes that his employer has huge problems and difficulties to face in successfully administering and maintaining his business in a highly organized and fiercely competitive world.

Recently an attempt was made to induce all the employees of the Toronto Street Railway system to go out on strike to enforce a series of demands made by them. To tie up the street railway system in a city like Toronto, would be a serious blow to the city and its business, and to everybody and an enormous loss to the entire community. The Toronto street railway is municipally owned—that is, it belongs to all the people. The management pointed out that if the men went on strike, the city would be forced to pay the increased expense to meet the men's demands could be met out of profits, and that any increase in fares was unnecessary, but in a municipally-owned system, operated to provide service rather than to accumulate profits, the statement of the management was accepted not as a bluff, and that either increased fares, or operating deficits to be made up out of increased taxes, must result.

So, when the matter of calling a "strike" finally came to a vote of the street railway employees, the men themselves rejected it by a ten to one vote in favor of arbitration, a very healthy indication of sane thinking on the part of the men and of the present trend of public sentiment.

Another Toronto labor incident, which has been cited as indicating the new and more reasonable point of view now actuating labor men, structural steel workers on three of the largest buildings in the city went on strike to compel their employers to establish a closed shop and employ only union men, which would be a reversal of the Company's policy during the last forty years of making no distinction between union and non-union men but treating them all frankly and alike. The closed shop would have sought to end once more branches of the building trades to go on strike in sympathy with them, but without success, and even the International Union, it is understood, refuses to endorse the attitude of the strikers.

The fact is becoming increasingly evident that in this age the old-fashioned methods of war are growing more and more in disfavor, no matter in what direction or cause they may be employed. People are becoming more impatient all the time that causes of dispute, whether between nations or in the industrial arena, or between individuals, be settled through the orderly processes of law and arbitration, and not by flying at each other's throats and engaging in combat, in which countless thousands of absolutely innocent persons are made suffer.

Alberta's Fuel Resources

Official Figures Place Total At Over A Billion Tons

An estimate of Alberta's coal resources, made recently by the International Geological Congress, places the total at 1,035,620 million tons, according to figures received by the provincial government. This is 14 per cent. of the world's coal supply, 72 per cent. of the British Empire's resources, and 87 per cent. of Canada's resources.

The mines presently operating in Alberta are capable of producing 15,000,000 tons annually, increasing to 25,000,000 tons by 1925. It has been estimated that if this production is maintained, the coal supply of Alberta will last for 40 years.

HE DIDN'T THINK DO WENTERY COULD BE RELIEVED

Mr. John Melling, Penae, Alberta, writes:—"I am an asthmatic sufferer, and after I had been in bed for several months, I suffered greatly with Do Wenty. The doctor said it was Do Wenty, but I thought it could be relieved. However, he declared me for quite a while, but did not get well. One day the doctor asked me if I had ever tried

"On his recommendation I bought a bottle and after I had used it I got some relief, so I put two more, and now I have had the do wenty since 1922."

Obtains Second Place

Blind Student At Brantford Successful In Essay Contest

Obtaining second place among 200 contestants all over the Dominion in a recent essay contest, a blind student at Brantford School for the Blind, Brantford, will receive congratulations of the entire minister of education, Hon. W. H. Price, conveyed by Dr. A. J. U. Colquhoun, deputy minister, to Supl. R. E. Price, Brantford, writing upon the subject, "Laura Secord, the Woman Who Made Confederation Possible," attained the highest place but one in this large field, and, in addition, three other pupils of the school received special prizes.

RHEUMATIC PAINS DUE TO THIN BLOOD

Relief Comes Through the Use Of Dr. Williams' Pink Pills

The most common sufferer can hope for in rubbing something on the muscles, and getting a little relief, and all the while the trouble is becoming more firmly rooted. It is now known that rheumatism is rooted in the blood, and that as the blood improves, the rheumatism will further thin and watery. To get rid of the trouble, you must go to the root of the trouble in the blood. That is why Dr. Williams' Pink Pills have proved so beneficial when taken for this trouble. They move new, light blood, which expels the poisonous acid and the rheumatic poisons.

There are thousands of former rheumatic sufferers in Canada who feel well and strong, who thank Dr. Williams' Pink Pills that they are now free from the aches and pains of this dreaded trouble. One of these is Mr. W. F. T. McCall, who says:—"I am one of the willing to let you know that I have received relief from the use of Dr. Williams' Pink Pills. After being in bed for seven weeks with rheumatism, and I could only sleep when opiates were given me. The medical men said I was taking a long time to get well, but I was advised to try Dr. Williams' Pink Pills. I began to get relief. After taking six bottles, I had never felt better in my life. In my severe case, this happened and I have had no return of the trouble since."

I may mention that the pills to two of my friends who were suffering with rheumatism and the pills were equally effective in both cases. Try Dr. Williams' Pink Pills for anemia, rheumatism, neuritis, indigestion or nervousness. Take them as a tonic if you are not in the best physical condition and cultivate the habit of taking them every day and night. You can get these pills of all druggists, or write to the nearest mail order house for them. Dr. Williams' Medicine Co., Brockville, Ontario.

In England and Scandinavian countries traffic keeps to the left; in most other European countries, to the right, according to the National Automobile Club.

A primitive people have been discovered a few hundred miles south of the Mediterranean, living in holes in the ground.

Five pretensions in the aeroplane are now being made in the production of a non-inflammable fuel which can be utilized in the present conventional type of aircraft engine.

A Russian engineer, Makhovnikov, is reported to have achieved success in this direction. By a secret chemical process he is able to convert heavy oil and vegetable oil into a light liquid fuel which is non-inflammable outside the engine. It can be used in the ordinary carburetor-type internal-combustion engine and will deliver more power for a given weight. These claims are said to have been substantiated by a variety of official tests.

First Surgeon—"Are you going to operate on this patient?" Second Surgeon—"I'm afraid to; there's something the matter with him."

Grapes grown in Holland and Belgium can be sold by water to London at a much lower cost than similar fruit grown in the south of England can travel by rail.

The physical and mechanical properties of silica gel and its availability in long straight-grained pieces have made it the most valuable timber for aeroplane construction.

An enemy knocks a man down, then a friend pretends to kick him.

RED CROSS AS FAIRY GODMOTHER

A Radio Tale Of The Far North Of Alberta

In the far north of Alberta stands a little house in the woods, looking like Wood's House in the Never-never Land for Lost Boys. Here dwelt a Scottish settler, his wife and family, and with them the grand parents and their family. These had gone hard with the pioneers from the Land of the Heather. Crops had failed, and the cold of Canada seemed intense, even to their brave Scottish blood.

Food was more too plentiful, clothing was scanty and bedding hard. The young wife, already a mother of several noisy, looking, babies, was expecting to present to the land or her adoption that greatest gift of all—a new Canadian.

Prospect looked bad to this Scotch family, friends were far away over the seas and the hills of their native land. To whom could they turn in their time of trouble?

Neighbors were few, and far between, and the Scotch and Canadian of all Westerners are. In one German home there was a radio, a new toy, that was proving so a playing ball to the Scotch and Canadian of all Westerners. It gave the latest news of the day to the people in the far north. Music was being sent and sung and spoken one day there came a new feature, a voice telling of the great Red Cross work being done in the world of war and healthier Canada.

Suddenly the blue-eyed German said, "Mitgaling suffering," and the Scotch and Canadian of all Westerners are. In one German home there was a radio, a new toy, that was proving so a playing ball to the Scotch and Canadian of all Westerners. It gave the latest news of the day to the people in the far north. Music was being sent and sung and spoken one day there came a new feature, a voice telling of the great Red Cross work being done in the world of war and healthier Canada.

The Golden Rule was put in action at once and through the neighborhood a German boy named John, a Scotch-Canadian was born under the Red Cross flag.

Seventh British Dominion

Palestine in Line For This Position

That Palestine would eventually become a seventh British Dominion was the prediction made by Dr. Selwyn Levin, Jewish leader, who opened the United Palestine Appeal for Western Canada recently.

"Great Britain has Palestine to take," declared Dr. Levin. "Her mandate will only be withdrawn when the Jewish nation shall have established itself as one of the cornerstones of British nations. Great Britain needs Palestine as the key to the country in the Near East and as a guardian state of the Suez Canal. In fact, she needs the Jews fully as much as they need her," he asserted.

Dr. Levin reported that the crisis which Palestine had recently undergone was almost over. Jewish settlers were making a striking success in agriculture. Oranges produced on Jewish farms were obtaining 20 per cent. higher prices than those from other countries.

Wretched From Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the shadow of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dispenses the cloud by removing the cause. It does relieve. It does restore the sufferer to a normal body and mental happiness.

A Land Of Farm Owners

Western Canada is a land of farm owners, according to census revelations. In no more than 10 per cent. of occupied farms are inhabited by their owners; in Saskatchewan over 77 per cent. and in Alberta over 75 per cent.

Soft corners are difficult to eradicate, but Holloway's Corn Remover will draw them out painlessly.

A street car goes much faster when you are running to catch it than after you have caught it.

Nail GYPROC right over Old Walls

GYPROC Advantages for Farm Buildings

How many rooms in your home have walls that are cracked and faded? Make them "good as new" by nailing Gyproc right over the old, unsightly wallpaper. When you've decorated with Albustone white and vermilion red, you can put it up yourself—easily, quickly and at a substantial saving.

Gyproc Joint Filler applied at all the joints insures a perfectly smooth, flat surface that will take any decoration.

"EMPIRE"

Fireproof Wallboard

Develop National Consciousness

No Better Way Of Strengthening the Bonds Of Empire

Nearly a year ago Canadians indulged in the unusual pleasure of celebrating the birthday of the Empire. Before that there had been virtually no celebration although the day, being a holiday, was used for purposes of recreation. It might have been supposed that there was a lack of national sentiment, but this was disproved by the tremendous popular response to the appeal for a fitting celebration of the anniversary which the young and old delved into the history of their country and found that it was rich in romance and interest. A great volume of literature illustrated this truth and also revealed the wealth of our natural resources and the opportunities which lie before the rising generation.

What seemed to be indifferent or apathetic apathy in the past is better described as nonchalance—a habit of doing great things and making very little fuss about them. They were all in the day's work. The pioneers who showed such marvellous industry, courage and patience in carving homes and farms out of the forests of old Canada probably seldom thought of themselves as nation-builders. Having succeeded in getting little guidance or help from the old governing class, it was almost needless to say that they were not in the capacity for self-government. When that was conceded, it was found by experience that the material the government was imperfect and led to friction and finally to deadlock. But instead of being discouraged, Canadians proceeded to work out a new constitution for themselves, and the fruit of their labors was the Confederation whose birth was again about to celebrate.

It would be no exaggeration to say that Canadian history is the history of the struggle for self-government. Formidable geographical difficulties have been overcome. Racial and religious differences which might have led to civil wars have been so managed that there is now a prevailing spirit of co-operation, unity and goodwill in agriculture, manufacturing, mining, forestry, commerce and transportation, enterprise and energy have produced marvellous progress; and in education and other marks of civilization Canada takes a foremost place. Canadian nation's sentiment did not evaporate with the speeches and ceremonies of last year. It is not a ferment but a plant deeply rooted and steadily growing. It is constructive, not destructive. Certain colonial-minded people show a curious incapacity to realize the nature and strength of this sentiment. They seem to identify life of Canada with hatred of the Empire of which Canada is a part; as if a young man could not fall in love and get married without quarrelling with his mother.

In trying to discourage national consciousness and patriotism these persons are making a hopeless fight against forces as irresistible as those of physical nature. The young—those who are young in heart and mind as well as those who are young in years—are fascinated by the prospect of national growth. They may for a time be a spring of inspiration, a mighty incentive, enabling daily toil to bring the heart of the nation to the work with the consciousness that earnest quest of truth and faithful work will help to build the nation.

Those who fear that national sentiment may conflict with Imperial sentiment should reflect that there is no better way of strengthening the Empire than to strengthen its various parts. A weak nation, Canada, would be a burden upon the Empire, as would a weak or dissatisfied Australia. The nation is the United Kingdom, and its life is an all-out domestic problem, as those of employment and housing, are really Imperial problems.

person who was told that he lived in an Empire on which the sun never set, said that he lived in a place on which the sun never rose. Such problems Great Britain must solve for herself whether any outside aid. No matter how strong one's Imperial sentiment, it is not his own country, in the government of which he shares—London Advertiser.

Tobacco Quality Depends On Curing

Precautions Are Necessary To Preserve Best Results

Tobacco, even of the best varieties, may be ever so well grown, but the value of the crop depends much on the manner in which it is cured. Not only must the tobacco plants be well nurtured, but the crop must be carefully handled to avoid injury by bruising, and then it must be so placed in proper curing barns as to allow a good circulation of air. There are some other precautions that are necessary to avoid loss of the tobacco during the curing process, the "drying" stage. The Tobacco Division of the Experimental Farms has issued a hanger for the guidance of tobacco growers, especially beginning ones, on the handling of the crop, particularly after it reaches the curing barn. This hanger which is obtained from the Dominion Branch of the Department of Agriculture, at Ottawa, gives advice on what to do when the weather is dry and when it is rainy, also during wet periods at the time of harvesting. Under this latter condition it is recommended to raise the temperature of the barn to about 60 degrees by means of charcoal burners, or heaters, or open fires of non-smoking material. If more favorable weather the ventilators must be kept open so as to avoid too rapid drying.

Continuous Wheat Growing

Growing Wheat Without Rotation Is Poor Practice

The growing of wheat continuously on the same land year after year without any rotation, is very poor practice. To make a test of this system as compared with farming with a crop rotation, wheat was grown on two of the Experimental Farms of the Western Provinces continuously year after year, without an application of any manure or fertilizer, on the same land for fifteen years. At the Experimental Station, at Scott, Saskatchewan, the average yield during this period was 12.1 bushels to the acre, while at the Lethbridge, Alberta Station, it was 12.1 bushels. While fair yields have been obtained by the system of continuous cropping, dry seasons have resulted in failures. A very serious drawback to the system of continuous growing is that weeds multiply so much so abundant that finally it becomes impossible to produce a profitable crop of wheat. Without a summer-fallow or an intertilled crop to provide an opportunity for thorough cultivation, or without a hay or clover crop to break the weeds, the weeds steadily increase and choke out the grain. Furthermore, the system makes no provision for distributing labor throughout the season, the result being that in the spring and fall months a large number of men are required.

Cooked In Every Language

A lady was many weeks without sending a cook. In despair she at last answered an advertisement in an Irish paper. She had a reply and appointed an interview, describing the woman's fare over.

"Can you cook?" asked the lady.
"Yes, ma'am," replied the reply.
"Do you understand French cooking?" as his husband likes dainty little dishes?
"Why, lar, yes, ma'am," said the cook. "I understand all furris' dishes."

"Really?" cried the lady, whose delight knew no bounds. "What can you do?"

"Well, ma'am, I can cook French beans, German sausage, French sprouts, Jerusalem artichokes, Spanish omelette, Dutch cheese?"

Had No Cane Mass

A school master named Bird was unpopular because of his quiet temper. One morning his pupils were out on the blackboard.

"Hail to thee, little spirit!" Bird then never went.

Two minutes later Mr. Bird stalked in, glared at the blackboard, glared at his class, and enquired, "Who wrote that?"

"Twenty hands went up and twenty voices replied, 'Please, sir, Shelley.'"

By night-grams is meant the number of years required for U. S. to travel from a star to us.

Will Boost New Industry

Reindeer Meat Being Transported In Alaska By Airplane

Alaska has found a new use for aeroplanes and, at the same time, a valuable aid in its growing reindeer industry.

Regular transportation of reindeer meat by aeroplane from this small native village in Northern Alaska has been started by the Arctic Prospecting and Development Company of Fairbanks.

The natives ever, the Arctic Prospector, was the first ever to transport reindeer meat in Alaska. By a coincidence, Pilot C. P. Crawford also brought the first meat sold by the Shungnak Co-operative Company, recently organized with the assistance of the Alaska division of the United States bureau of education.

The natives ever, through its great excitement by their first sight of an aeroplane, but experienced their greatest surprise when the chief of the Koyukuk Indians, ancient enemies of the Shungnak Eskimos, climbed from the plane for a friendly visit. For years the Eskimos had feared the Koyukuk tribe and as recently as two years ago maintained night guards to warn against any attack.

Much of the meat taken by plane from Shungnak will be sent to the Koyukuk district, 150 miles South, where the prospecting company operates and sells. A few more flights are planned for the near future.

Alberta Provincial Peaky Plant

Over Ten Thousand Chickens Distributed This Year To Peasants

Over ten thousand chicks have been distributed during this spring from the Provincial Government poultry plant at Oliver, Alberta. The charge of the plant report is that demand has been greatly in excess of the supply and that many applicants have been referred to other breeders and hatcheries for their requirements. The breeds represented in the shipments include White Leghorns, Black Rocks, and White Wyandottes. Over three thousand chicks are being turned on the farm this spring, and in view of their increasing economic importance, a beginning is being made this year with turkeys.

Manitoba Stock For North Dakota

Because of a shortage of bulls in the north-western United States, Martin Apley, livestock feed dealer for the Greater North Dakota Association, has just purchased in Manitoba sixty short horns for distribution throughout the State of North Dakota.

Prince Will Take Salute

"The Prince of Wales will take the salute at the Moose Gate on August 8," said Major James Harter in a recent report. Major Harter is a regular pilgrim for the 10,000 ex-servicemen and women to the battleside at Arras, where the British Legion has organized.

"When we stop asking questions and are satisfied with our knowledge along any line whatever, this is the end of progress."

"Uncle Wain: 'How's things down to that college where your son goes?'"

"Uncle Wain: 'I guess the college is dead.'"

"Uncle Wain: 'No!'"

"Uncle Wain: 'I write you as how he's going around with the college widow!'"

Pioneer of Great Shipping Line

The big "Jean" was the pioneer vessel of the Allan Line fleet, which later became incorporated in the Canadian Pacific. In 1819—the year the Allan Line was formed—a Glasgow newspaper contained a "Notice to shippers and passengers to Canada, that the brig 'Jean,' Alexander Allan, Master, will clear from Greenock for Quebec on the 1st June, and proceed to sea at the first favourable opportunity thereafter." The notice stated that the ship was a "brave vessel" and that her sailing was contained in the issue of June 11th: "Beated June 11th, 'Jean,' Allan master, left Greenock for Quebec on the 1st June, and arrived at 100 tons having been launched at Irvine in the spring, with dimensions 70ft. 8in. long, a beam of 22ft. 6in. and 12ft. 6in. depth of hold. She has a single steam engine with vessels of her type at that date, and was carved built. Although the advertisement and all the history books describe her as a brig, students of naval architecture will recognize her rigging as that of a brigantine—a very handy and economical rig.

The Big Jean

An illustration of the change in the size of the shipping line is shown by the fact that the "Duchess of Bedford," a new Canadian Pacific cable ship, could carry the "Jean" crosswise and only ten inches of the planer's bow and stern would project.

Bulbs That Have Bloomed

Tipps May Be Left In the Ground For Several Seasons

Tulips, daffodils and other flower bulbs that are to be left in the ground year after year, should be left in the ground for several seasons.

Regular transportation of reindeer meat by aeroplane from this small native village in Northern Alaska has been started by the Arctic Prospecting and Development Company of Fairbanks.

The natives ever, the Arctic Prospector, was the first ever to transport reindeer meat in Alaska. By a coincidence, Pilot C. P. Crawford also brought the first meat sold by the Shungnak Co-operative Company, recently organized with the assistance of the Alaska division of the United States bureau of education.

The natives ever, through its great excitement by their first sight of an aeroplane, but experienced their greatest surprise when the chief of the Koyukuk Indians, ancient enemies of the Shungnak Eskimos, climbed from the plane for a friendly visit. For years the Eskimos had feared the Koyukuk tribe and as recently as two years ago maintained night guards to warn against any attack.

Generals Up-To-Date

Chinese Commune To War Zone In Manchuria

Generals in Chinese armies commute from home to work at the front in motor cars, and join in the same in trucks for the same purpose, according to George C. Magagnoli, secretary-treasurer of the Fraser-Pedford, Inc., auto dealers in Yantai.

Mr. Magagnoli recently visited a big auto factory in Detroit, after six years in China.

Truck sales in China are exceeding passenger car business, according to Mr. Magagnoli, but prospects for a rise in business within a few months will reverse the situation. The absence of roads appears to make it impossible to get about thousands of people from all kinds of homes and with varied nationalities.

"There are about 20 bus lines operating in China, over routes from 70 to 200 miles in length. They seldom compete with railroads, and will increase rapidly when the revolution is ended. Road building will start when the men are discharged from the armies. Practically all taxes go for military purposes now."

Prince Will Take Salute

"The Prince of Wales will take the salute at the Moose Gate on August 8," said Major James Harter in a recent report. Major Harter is a regular pilgrim for the 10,000 ex-servicemen and women to the battleside at Arras, where the British Legion has organized.

When We Stop Asking Questions

"Uncle Wain: 'How's things down to that college where your son goes?'"

"Uncle Wain: 'I guess the college is dead.'"

"Uncle Wain: 'No!'"

"Uncle Wain: 'I write you as how he's going around with the college widow!'"

Fire Is Greatest Menace To Forest

It Takes In Cut Nature Looks After Reformation

There is an oft-expressed anxiety over the tremendous demands that foresters and other periodicals are making upon the forests, lest in a short time the earth will be short of all its forested trees. But from such multitude certain facts should give relief.

With the pace of cutting, followed in the forests supplying pulp wood for newspaper, and the resultant nature reformation, the forests should live for all time. The transformation into pulp and then to newspaper, may go forward even beyond the present demands without impairing the forest. The reformation of the supply which nature with an amazing industry is continuously manufacturing day and night through the seasons and through the years.

So a tree, suitable for newspaper, may be said to serve its day and generation of human life and then to serve the world's need for news. Others of its kind that will serve the world in the manner. There need be no concern over the great annual consumption of pulp wood. If only such a pulp prevails as the governments of Ontario and Quebec, notably, are following with regard to their forests.

The real menace to the forests is fire. A fire which is destroyed by fire is a loss to the making of paper and probably for any other use. The purpose, then, is to prevent fire in the forests. There is nothing more depressing in nature than great stretches of burned-over land filled with blackened skeletons of a forest. The greatest growth that follows a fire. The great need, therefore, is to provide against forest fires and the means of fighting them.

Find Out From Children

They Give One To What Is Termed Their Elders

Investigating in the social problem with which school children in Chicago, members of the sixth grade, are most familiar. Diverse and all sorts of things are being reported. After day after day checks over maps and reports compiled by his geographers and field men, there is nothing haphazard about his methods.

"I'm going to crack it open," he said. "I'm going to prove what geologists have been saying for years. I am going to give the five best years of my life to this job of developing the north country."

And so this little man versus the map is on. Old-timers say that Jack Hamilton will win—because he always keeps his word.

Smallest Cheque Issued

Ontario Government Pays Three Cents To Balance Account

Sticklers for accuracy in the exact payment of accounts, the Ontario Government sent a record in making out the smallest cheque ever to be issued by the province to its treasury.

The cheque was for a counter settlement as railway tax, and \$2,007.10 owed by London to the Government as railway tax, and \$2,007.10 owed by the province to the city for local patients at the Ontario Hospital.

Canadian Professor At Yale

Dr. P. D. Herelle, one of the world's leading bacteriologists, a Canadian, but for years a resident of Paris, has become professor of bacteriology at the Yale Medical School.

He has made important contributions in many fields of pure applied bacteriology.

Darshly: The grungiest sent that second hand car you ordered and I tried it out.

William: How many people does it carry comfortably?

Darshly: None.

Canada's Timber

It is estimated that of the total area of timber in Canada (242,377,000,000 cubic feet), the softwood, or coniferous species account for 418,000,000,000 cubic feet, or 70 per cent. The hardwood, or deciduous species, account for 124,377,000,000 cubic feet, or 29 per cent.

Richardson Palace, the seat of the Duke of Marlborough, the largest private residence in England, is a main building alone, covers three acres.

An Amazing Treasure Hunt

Hundreds Of Prospectors Being Directed In Northwest By Jack Hamilton

The most amazing treasure hunt in the history of the world is being played today in the Canadian Northwest. It is a treasure hunt organized by a positive expedition with its headquarters in the Yukon, a battle to find a quarter of a century Hamilton has been a leading figure in mining circles. He was recognized as a pioneer in the development of Flin Flin; he is president of Howey, Barker and Green-Holmes; he has guided more prospectors than any dozen men put together—and he is still on the job.

Hamilton is directing operations at headquarters, but less than a mile away his private plane is moved round to take him into the mining line as soon as a discovery is reported. Day after day he checks over maps and reports compiled by his geographers and field men, there is nothing haphazard about his methods.

"I'm going to crack it open," he said. "I'm going to prove what geologists have been saying for years. I am going to give the five best years of my life to this job of developing the north country."

And so this little man versus the map is on. Old-timers say that Jack Hamilton will win—because he always keeps his word.

CECIL T HALL, Druggist.

THE PIONEER DRUGGIST

Interesting Local Items

Monday, Nov. 12th will be observed throughout Canada as Thanksgiving Day.

At a precautionary measure there will be no picture show at the Camco this week.

Keep in mind the Halloween supper in St. Ambrose Parish Hall on Thursday, Oct. 25th. Watch for particulars about the concert after the supper.

On Friday evening, Oct. 19th, the local I. O. O. F. lodge will put on a whist drive and dance in Cliff hall. Good prizes for the whist drive and an up-to-date orchestra has been engaged. Everbody welcome. Tickets \$1.00 a couple, extra ladies 50c.

Art Lyons returned to town last weekend after spending a few months in the mining districts of northern Ontario and Manitoba, looking after his company's interests in that district. He reports great activity.

John Devitt is a business visitor in town this week.

The snow and rain sleet which accompanied yesterday's cold snap did considerable damage to the trees and shrubs.

Hon. Chas. Stewart, Minister of the Interior, stopped over in Medicine Hat last Tuesday on his way west.

Don't forget the S. O. E. whist drive and dance in Cliff hall tomorrow (Friday) evening. An invitation is extended to all to attend. Admission \$1.00 a couple, extra ladies 50c.

The regular monthly meeting of the local Legion will be held in the club rooms on Sunday afternoon at 2 o'clock. Mr. Harper, of Medicine Hat, will be speaker. In view of the recent cold snap the time held last month, a good attendance is requested.

Pringle Henderson, who has been in western Canada on the T. S. for the past few weeks, riding horses in the big circles, arrives today. Pringle went away as a boy and has come back a much travelled young man.

C. A. Magrath, a former federal member for this constituency, was a visitor in Medicine Hat last Saturday.

CARD OF THANKS

Before leaving for my old home in China I wish to take this opportunity to thank the people of Redcliff for the liberal response they have extended to me during the many years I have conducted a laundry in Redcliff. I would also solicit a continuance of that patronage for my brother who is now conducting the business in Redcliff. Let me, too, express my sincere thanks for the many kindnesses shown me by the people of Redcliff since I came here.

Yours very sincerely
